

SAVE THE DATE

10-11 September

 FHNW Brugg-Windisch

Join Switzerland's premier innovation event where energy data meets action!

The Mission

We need developers, researchers, and energy experts to transform elusive datasets into practical, scalable prototypes. Whether you're here to experiment or launch a solution, your skills will address the most pressing grid challenges of today while delivering tangible results.

Why Join Us?

Rapid Prototyping: Move from raw data to a working model in just 36 hours.

Expert Mentorship: Hands-on support from industry leaders and academic experts.

High-Impact Networking: Connect with Switzerland's top engineers and specialists.

Career Opportunities: Meet directly with students and young professionals on the hunt for top talent - this is your chance to find your next employee.

Industry Shapers: Position your company as an Innovation Leader, increase visibility and showcase your commitment to shaping the future.
