ENGINEERS – IDEATORS – DESIGNERS

Are you eager to develop a better understanding of our energy production, consumption and distribution? Do you want to create new solutions to make the energy industry more transparent, social and sustainable?

Join our prototyping adventure to brainstorm, discuss and shape the future of energy in multi-disciplinary teams!

On Sept. 11-12th 2025 the Energy Data Hackdays will take place for the seventh time at the FHNW Campus in Brugg-Windisch. Let us use energy data to improve our common understanding of energy and work further on new solutions to shape the future of energy use in Switzerland. Energy companies, public administrations and other institutions will disclose exciting new energy data for this purpose.

Looking forward to your new ground-breaking and game-changing projects!
